DERICK ATTAVACHI MATETE

ELECTRICAL & TELECOMMUNICATIONS ENGINEERING STUDENT

Nairobi, Kenya | +254 700 814 046 | attavachiderick@gmail.com
Portfolio: attavachi.github.io/portfolio-website/

PROFESSIONAL PROFILE

A student pursuing a Bachelor of Science student in Electrical and Telecommunications Engineering at Multimedia University of Kenya, with practical experience from academic and personal technology projects. Skills include Microsoft Word, Excel and PowerPoint . email and online communication, Canva poster design, HTML and CSS, and beginner-level customer support. Created and published a personal portfolio website and built introductory Arduino circuits. Seeking an entry-level opportunity where strong computer skills, attention to detail, willingness to learn and clear communication can contribute to the team.

CORE SKILLS

Office & Productivity Microsoft Word – Advanced Microsoft Excel - Advanced Microsoft PowerPoint – Advanced	**Communication** Email and online communication — Advanced Customer support — Intermediate
Digital Content Canva and poster design —Intermediate	**Web Development** HTML and CSS — Intermediate; personal website publishing
Technical Introductory Arduino programming and electronics projects	**Additional Technical Exposure** C++, Python, JavaScript, MATLAB and AutoCAD through learning and project work

PROJECTS

Personal Portfolio Website

Created and published a personal website to present skills and project work. This demonstrates introductory web development, organizing digital content and maintaining an online portfolio.

Arduino and Basic Electronics Projects

Built and tested introductory circuits including LED blinking and sequencing, traffic-light logic push-button LED control, potentiometer-controlled LED brightness, an LDR-based street-light circuit, buzzer alerts, Light Detector Theft Alarm and other security systems, Weather Station circuit, Door lock circuit, smart door and water level detector circuit. Practiced circuit connections, uploading code and troubleshooting basic hardware behavior.

Academic Programming and Engineering Work

Learning and applying C++, Python, JavaScript and MATLAB in programming and engineering coursework, alongside exposure to circuit analysis, electronic devices and AutoCAD-based design tasks.

EDUCATION

Bachelor of Science in Electrical and Telecommunications Engineering
Multimedia University of Kenya

WORK PREFERENCES

Open to entry-level roles across administration, customer support, digital content, office support and technical assistance. Available on weekday evenings and weekends, with occasional in-person attendance in Nairobi by arrangement.
